

Baling Machine

Smart Waste Management. Cleaner Spaces. Greater Value.

WHAT IS A BALING MACHINE?

A **Baling Machine** compresses waste materials like **paper, cardboard, plastics, metals, and textiles** into compact, manageable bales. Ideal for businesses producing large volumes of waste, it's a smart, sustainable solution for modern waste management.

- ❖ **Customizable from 20 tons to 200 tons** to suit specific operational needs and waste volumes.

WHY CHOOSE A BALING MACHINE?

- **Reduce Waste Volume**
Compresses bulky materials to free up space and make handling easier.
 - **Save Time & Labor**
Automates waste compression—no need for manual prep or breakdown.
 - **Generate Revenue**
Baled materials are more valuable and easier to sell to recyclers.
-

SAMKITI

Environment and Engineering Solutions Pvt Ltd.

THE CHALLENGES OF LOOSE WASTE

- Occupies excessive space
- Costly and inefficient to transport
- Time-consuming to manage
- Increases risk of workplace accidents
- Hampers recycling efforts due to contamination
- Environmental and compliance concerns

THE BALER SOLUTION

- Frees up space by compressing waste
- Reduces transport and disposal costs
- Streamlines waste handling and storage
- Promotes recycling by keeping materials organized
- Minimizes health and safety risks
- Supports environmental compliance
- Encourages waste segregation for better recycling

BENEFITS AT A GLANCE

- ✓ Compact, easy-to-handle waste bales
- ✓ Customizable capacity: **20 tons to 200 tons**
- ✓ Lower transportation & disposal costs
- ✓ Better recycling efficiency
- ✓ Clean and safe workplace
- ✓ Simple operation—perfect for any facility
- ✓ Supports your green initiatives

Thanking you.
